Subject: Please listen to Apple Computer...

To Honorable J. Frederick Motz,

I support and volunteer my time and equipment to help my three daughters in three schools in the San Jose, CA area: Mulberry Elementary, Baker Middle School and Westmont High School. All three schools have a mix of computers, but the Macintosh systems are the most prized for their ease of use, installation and training. I'm a software engineer and manager for 20+ years, and have used Windows, Macintosh and Unix systems many times, but I highly recommend using Mac systems at the schools. I back this up with donating time and equipment.

I strongly object to rewarding Microsoft for their moral and civic failures by helping them corner the education market. Determent, not rewards should be what the court is looking for.
